## CSS REFERENCE

The CSS File Reference lists each design-related CSS file in the Site Store Pro installation and contains detailed description of every CSS class. The style sheet description specifies which store files are referenced by the CSS file.

All CSS files are located in the /CSS/ folder on the installation.

If a CSS class formats a dynamically-generated text element, the description will include where in the web-based admin the corresponding text can be modified or how the text is generated dynamically.

### MAIN\_STYLESHEET.CSS

The main\_stylesheet.css file is attached to ALL design-editable pages on the website (online store) and contains generic site design and link classes.

- **.Body** (Sets page background, default page text and page margins.)
- **a:link** (Sets site links properties.)
- **a:visited** (Sets visited links properties.)
- **a:hover** (Sets properties when hovering over links with mouse.)
- **a:active** (Sets active (clicked) link properties)
  
- **.Site\_OUTER\_Border** (Sets the properties of the main outer-most table of the sample store design.)
- **.header\_background** (Sets the properties of header section (table column) of the sample store design.)
- **.Main\_Body\_background** (Sets the properties of section (content area) of the sample store design.)
- **.bottom\_links\_background** (Sets the properties of footer links section (table column) of the sample store design.)
- **.bottom\_links** (Sets the properties of individual footer links columns of the sample store design.)
- **.Bottom\_Copyright\_Text** (Sets the bottom section properties (copyright) of the sample store design.)

**Note:** If you are applying Site Store Professional to an [existing website design](#), you will most likely want to delete the CSS classes denoted in **red** so those classes will not conflict with your current CSS definitions. All other CSS classes in Site Store Professional are uniquely named to prevent class conflicts.

## SITE\_STORE\_PRO.CSS

The `site_store_pro.css` file is attached to ALL design-editable pages on the website (online store) and contains feature-specific classes that format the [quick-cart display](#), [search bar](#), [random home page item display](#) and the [dynamic left menu system](#) included with the sample store.

- `.SSPro_Home_Page_Items_Table` (Sets the table properties of the random home page item display. This class formats content in the `/sitestorepro/display/home_page_display_with_image.asp` include file ONLY.)
- `.SSPro_Home_Page_Items_Header` (Sets properties of the PRODUCT TITLE AREA on the home page item display. This class formats content in the `/sitestorepro/display/home_page_display_with_image.asp` include file ONLY.)
- `.SSPro_Store_QuickCartText` (Sets the properties of the text on the shopping cart summary (quick cart). This class formats content in the `/sitestorepro/display/quick_cart.asp` and `/sitestorepro/display/quick_cart_secure.asp` include files ONLY. The text that is formatted by this class is controlled via the back-end admin in Store Setup > Shopping Cart Setup > Quick Cart Configuration.)
- `.SSPro_Store_SearchBar_SearchLabel` (Sets the properties of the Search Bar Label Text. This class formats the `/sitestorepro/display/search_bar_content.asp` and `/sitestorepro/display/search_bar_content_secure.asp` include files ONLY. By Default The Text is Set to 'Product Search' This text is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Item Search Configuration.)
- `.SSPro_Store_SearchBar_AdvancedSearchLink` (Sets the properties of advanced search link text located directly below the Site Search Bar . By default the text is set to 'Product Search' . This class formats the `/sitestorepro/display/search_bar_content.asp` and `/sitestorepro/display/search_bar_content_secure.asp` include files ONLY This text is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Item Search Configuration.)
- `.SSPro_Store_QuickCart_SearchField` (Sets the properties of the Search Field on the SEARCH BAR (not the quick cart display). This class formats the `/sitestorepro/display/search_bar_content.asp` and `/sitestorepro/display/search_bar_content_secure.asp` include files ONLY. The text that is formatted by this class is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Item Search Configuration.)
- `.SSPro_Store_Left_Panel` (Sets the background image and border of the left panel that contains the "Shop-By" menus. Example: Shop By Category, Shop-By-Type...)
- `SSPro_Store_MENU_CategoryTitle` (Sets the properties of the text label on the left menu panel for the Shop-By-Category menu. The text that is formatted by this class is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Dynamic Menus Configuration)
- `.SSPro_Store_MENU_SubCatTitle` (Sets The properties of the text label on the left menu panel for the Shop-By-Sub-Category menu. (Shop-By-Type) The text that is formatted by this class is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Dynamic Menus Configuration)
- `.SSPro_Store_MENU_BrandTitle` (Sets the properties of the text label on the left menu panel for the Shop-By-Brands (Manufacturers) menu. The text that is formatted by this class is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Dynamic Menus Configuration)
- `.SSPro_Store_MENU_CollectionsTitle` (Sets the properties of the text label on the left menu panel for the Shop-By-Sub-Collection menu. The text that is formatted by this class is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Dynamic Menus Configuration)
- `.SSPro_Store_MENU_StylesTitle` (Sets the properties of the text label on the left menu panel for the Shop-By-Styles menu. The text that is formatted by this class is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Dynamic Menus Configuration)
- `.SSPro_Store_MENU_OccasionsTitle` (Sets the properties of the text label on the left menu panel for the Shop-By-Occasion menu. The text that is formatted by this class is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Dynamic Menus Configuration)
- `.SSPro_Store_MENU_PriceRangeTitle` (Sets the properties of the text label on the left menu panel for the Shop-By-Price menu. The text that is formatted by this class is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Dynamic Menus Configuration)
- `.bodymain` (Generic class to allow quick site-wide formatting of similar text regions on the site.)

## SITE\_STORE\_PRO\_STORE.CSS

The `site_store_pro_store.css` file is ONLY attached to the [/store/default.asp page](#). It formats the [featured items](#) and [special \(sale\) items display](#) areas on `/store/default.asp`.

- `.SSPro_Store_FeaturedItems_SECTION` (Sets the table properties of the FEATURED items display on the `/store/default.asp` page. The featured item display must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. Also, individual products must be marked as Featured Items in the web-based admin for items to appear in the featured items section.)
- `.SSPro_Store_FeaturedItems_Title` (sets text properties of the section title on the FEATURED items display on the `/store/default.asp` page. The featured item display must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. The dynamic text for this element can also be edited in the web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration .)
- `.SSPro_Store_FeaturedItems_Description` (Sets text properties of the section description on the FEATURED items display on the `/store/default.asp` page. The featured item display must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. The dynamic text for this element can also be edited in the web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration)
- `.SSPro_Store_SpecialItems_SECTION` (Sets the table properties of the SPECIALS display on the `/store/default.asp` page. The featured item display must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. Also, individual products must be marked as Featured Items in the web-based admin for items to appear in the featured items section.)
- `.SSPro_Store_SpecialItems_Title` (Sets text properties of the section title on the SPECIALS display on the `/store/default.asp` page. The featured item display must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. The dynamic text for this element can also be edited in the web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration .)
- `.SSPro_Store_SpecialItems_Description` (Sets text properties of the section description on the SPECIALS display on the `/store/default.asp` page. The featured item display must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. The dynamic text for this element can also be edited in the web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration)
- `.SSPro_Store_FeaturedItems_Price` (Sets text properties of the price label on the FEATURED items display on the `/store/default.asp` page. The featured item display must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. The dynamic text for this element can also be edited in the web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration .)
- `.SSPro_Store_FeaturedItems_RegularPrice_LineThrough` (Formats the text for the item's regular price with a strikethrough for items that have a discounted price in the featured item display listing. The featured item display must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. The dynamic text for this element can also be edited in the web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration)
- `.SSPro_Store_FeaturedItems_Special_Price` (Formats the text for the item's special (discounted) price in the featured item display listing. The featured item display must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. The dynamic text for this element can also be edited in the web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration)
- `.SSPro_Store_FeaturedItems_Wholesale_Price` (Formats the text for the item's WHOLESALE price in the featured item display listing. NOTE: The user must be logged in as a WHOLESALE user for the wholesale price to appear. The featured item display also must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. The dynamic text for this element can also be edited in the web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration)

- **.SSPro\_Store\_SpecialItems\_Price** (Sets Text Properties of the Price Label on the SPECIALS display on the /store/default.asp page. The SPECIALS item display must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. The dynamic text for this element can also be edited in the web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration .)
- **.SSPro\_Store\_SpecialItems\_RegularPrice\_LineThrough** (Formats the text for the item's regular price with a strikethrough for items that have a discounted price in the SPECIALS display listing. The SPECIALS display must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. The dynamic text for this element can also be edited in the web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration)
- **.SSPro\_Store\_SpecialItems\_Special\_Price** (Formats the text for the item's special (discounted) price in the SPECIALS display listing. The SPECIALS display must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. The dynamic text for this element can also be edited in the web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration)
- **.SSPro\_Store\_SpecialItems\_Wholesale\_Price** (Formats the text for the item's WHOLESALE price in the SPECIALS listing. NOTE: The user must be logged in as a WHOLESALE user for the wholesale price to appear. The SPECIALS display also must be turned on in web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration for the section to appear on the store. The dynamic text for this element can also be edited in the web-based admin under Store Setup > Store URL (Website Address) & Default Page Configuration)

## SITE\_STORE\_PRO\_SEARCH\_RESULTS.CSS

The `site_store_pro_search_results.css` file is attached to the [store/store\\_results.asp](#) page and the [store/search.asp](#) page. This CSS file is used to format the item [search form\(s\)](#) and [search results](#).

- `.SSPro_Store_SearchResults_SECTION` (Creates a border and sets default font size of the search results areas)
- `.SSPro_Store_SearchResults_Title` (Sets the search results title above the search results. The text string that this CSS class formats is generated by the "section" value in the search results URL string)
- `.SSPro_Store_SearchResults_Description` (Sets the text properties of the search results description that will be returned to the user for ANY search. Example: "Below are the items that matched your shopping criteria". The text that is formatted by this class is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Item Search Configuration.)
- `.SSPro_Store_SearchResults_Sizes_Field` (Sets the text properties of the size field on returned items from a search. This field will only display if the item in the search results contains a size option)
- `.SSPro_Store_SearchResults_Colors_Field` (Sets the text properties of the color field on returned items from a search. This field will only display if the item in the search results contains a color option.)
- `.SSPro_Store_SearchResults_Materials_Field` (Sets the text properties of the materials field on returned items from a search. This field will only display if the item in the search results contains a material option)
- `.SSPro_Store_SearchResults_Sort_Label` (Sets the properties of the search results sort label. Example: "Sort By". This css is only used in the `/sitestorepro/display/search_results_sorter_content.asp` page. The text that is formatted by this class is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Item Search Configuration.)
- `.SSPro_Store_SearchResults_Sort_LIST` (Sets the properties of the search results sort drop-down list. Example: This css is only used in the `/sitestorepro/display/search_results_sorter_content.asp` page. The list items that populate the item sort list that is formatted by this class are controlled via the back-end admin in Store Setup > Store & Item Display Setup > Item Search Configuration)
- `.SSPro_Store_AdvancedSearch_Form_BORDER` (Sets the properties of the table that contains the advanced product search form that appears on both the `/store/store_results.asp` and `/store/search.asp` pages. The include files on the form are: `/sitestorepro/display/advanced_search_form_content.asp` & `/sitestorpro/display/advanced_search_form_content_NO_RESULTS.asp`.)
- `.SSPro_Store_AdvancedSearch_Form_ROWS` (Sets the properties of the table rows in the product search form that appears on both the `/store/store_results.asp` and `/store/search.asp` pages. The include files on the form are: `/sitestorepro/display/advanced_search_form_content.asp` & `/sitestorpro/display/advanced_search_form_content_NO_RESULTS.asp`.)
- `.SSPro_Store_AdvancedSearch_Form_BROWSE_CAT_ROW` (Sets the properties of the Categories table row in the product search form that appears on both the `/store/store_results.asp` and `/store/search.asp` pages. The include files that are containing the form are: `/sitestorepro/display/advanced_search_form_content.asp` & `/sitestorpro/display/advanced_search_form_content_NO_RESULTS.asp`.)
- `.SSPro_Store_AdvancedSearch_Form_Fields` (Sets the properties of the text entry form fields in the product search form that appears on both the `/store/store_results.asp` and `/store/search.asp` pages. The include files that are containing the form are: `/sitestorepro/display/advanced_search_form_content.asp` & `/sitestorpro/display/advanced_search_form_content_NO_RESULTS.asp`.)
- `.SSPro_Store_AdvancedSearch_Form_BROWSE_CAT_Menus` (Sets the properties of the category drop-down lists in the product search form that appears on both the `/store/store_results.asp` and `/store/search.asp` pages. The include files that are containing the form are: `/sitestorepro/display/advanced_search_form_content.asp` & `/sitestorpro/display/advanced_search_form_content_NO_RESULTS.asp`. The drop-down lists are populated dynamically be the categories, sub-categories and collections entered through the web-based admin. The category, subcat or collection lists can be turned off/on and labeled in the web-based admin under Store Setup > Store & Item Display Setup > Item Search Configuration)
- `.SSPro_Store_AdvancedSearch_Form_LeftColumn` (Sets the properties of the left column (search field label column) in the product search form that appears on both the `/store/store_results.asp` and `/store/search.asp` pages. The include files that are containing the form are: `/sitestorepro/display/advanced_search_form_content.asp` & `/sitestorpro/display/advanced_search_form_content_NO_RESULTS.asp`. The specific column labels can be turned off/on and modified in the web-based admin under Store Setup > Store & Item Display Setup > Item Search Configuration)

- **.SSPro\_Store\_AdvancedSearch\_Form\_Button** (Sets the properties of the form submit button in the product search form that appears on both the /store/store\_results.asp and /store/search.asp pages. The include files that are containing the form are: /sitestorepro/display/advanced\_search\_form\_content.asp & /sitestorepro/display/advanced\_search\_form\_content\_NO\_RESULTS.asp. The text that appears on the search (submit) button can be and modified in the web-based admin under Store Setup > Store & Item Display Setup > Item Search Configuration)
- **.SSPro\_Store\_SearchResults\_NO\_RESULTS\_FOUND** (Sets the text properties for the "No Items Found" message that is returned to the user when their product search is empty. This class is only used on /sitestorepro/display/search\_results\_NO\_RECORDS\_FOUND\_content.asp. The text that is formatted by this class is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Item Search Configuration.)
- **.SSPro\_Store\_SearchResults\_NO\_KEYWORD\_PROVIDED** (Sets the text properties for the message that is shown to the user when a blank keyword search is submitted. This class is only used on /sitestorepro/display/search\_results\_NO\_KEYWORD\_PROVIDED\_content.asp. The text that is formatted by this class is controlled via the back-end admin in Store Setup > Store & Item Display Setup > Item Search Configuration.)
- **.SSPro\_Store\_SearchResults\_CURRENT\_PAGE\_NUMBER\_IN\_RESULTS\_LIST** (Sets the text properties to format the current page number of the search results. This class is only used on /sitestorepro/display/search\_results\_pages\_list\_content.asp.asp.)
- **.SSPro\_Store\_SearchResults\_DRILLDOWN\_TITLE** (The CSS is not used in the default installation. This class is reserved for future use in directory-style sites that need to format complex directory trees.)
- **.SSPro\_Store\_SearchResults\_DRILLDOWN\_DESCRIPTION** (The CSS is not used in the default installation. This class is reserved for future use in directory-style sites that need to format complex directory trees.)
- **.SSPro\_Store\_RegularPrice\_LineThrough** (Formats the text for the item's regular price with a strikethrough for items that have a discounted price in the search results. This class is used ONLY on /store/store\_results.asp. )
- **.SSPro\_Store\_Special\_Price** (Formats the text for the item's discounted (special) price. This class is used ONLY on the /store/default.asp & /store/store\_results.asp pages. . This class is used in the featured items display, the specials display and the search results display.)
- **.SSPro\_Store\_Wholesale\_Price** (Formats the text for the item's Wholesale Price. This class is used ONLY on the /store/default.asp & /store/store\_results.asp pages. . This class is used in the featured items display, the specials display and the search results display. NOTE: This class will not appear unless the user is logged in as a wholesale user)

## SITE\_STORE\_PRO\_PRODUCT\_VIEW.CSS

The site\_store\_pro\_search\_results.css file is ONLY attached to the [store/item\\_view.asp](#) and [/store/recommended\\_items.asp pages](#). This CSS file is primarily used to format the item details page. (ADD TO CART page)

- **.SSPro\_Product\_ProductInformation\_TABLE** (This class sets the table formatting for the product details display table. The table contains the product information and the image(s). Note: This CSS sets the width of the product information display to a fixed pixel width by default.)
- **.SSPro\_Product\_Title** (This class formats the Product Or Event Title (Name) On the Products Details Page. The title of the product is generated dynamically from the database. The product title text is set in the web-based admin by editing a specific product's information.)
- **.SSPro\_Product\_Description** (This class formats the Product or event description text on the product's details page. the description of the product is generated dynamically from the database. The product description text is set in the web-based admin by editing a specific product's information.)
- **.SSPro\_Product\_Bullets** (This class formats the product or event bullets (feature points) on the product's details page. The text content of this element is generated dynamically from the database. The product bullets are set in the web-based admin by editing a specific product's information.)
- **.SSPro\_Product\_Shipping\_Estimate\_Message** (This class formats the shipping estimate message text on the product's details page. The text content of this element is generated dynamically from the database. The shipping estimate text is set in the web-based admin by editing a specific product's information.)
- **.SSPro\_Product\_Inventory\_Alert\_Message** (This class formats the inventory alert message text on the product's details page. This text will only appear for items that are out-of-stock. The text content of this element is generated dynamically from the database. The inventory alert for individual products is controlled in the inventory section of the web-based admin system.)
- **.SSPro\_Product\_ADD\_TO\_CART\_Table** (This class formats the table that contains the item options on the product details page. This table contains options such as QTY, color, size, price, etc . This table contains an image background by default as well as a thin, pixel bordering.)
- **.SSPro\_Product\_ADD\_TO\_CART\_Table\_LEFT\_COLUMN** (This class formats left column of the table that contains the item options on the product details page. The row labels in this column; example, Price, Qty, Size, Color, etc are generated dynamically from the database. The text labels in this column are managed in the web-based admin under Store Setup > Item Display Configuration.)
- **.SSPro\_Product\_ADD\_TO\_CART\_QTY\_FIELD** (This class formats the QUANTITY input text box on the product details page. Text font, size, color and input box formatting options are set in the default configuration for this class.)
- **.SSPro\_Product\_ADD\_TO\_CART\_List\_Menus** (This class formats the list menus such as size, color, material and custom option 1 & 2 on the product details page. Text font, size, color and list formatting options are set in the default configuration for this class.)
- **.SSPro\_Product\_ADD\_TO\_CART\_Text\_AREAS** (This class formats the multi-line, text input form areas on the product details page including gift wrap message, personalization message and custom text areas 1-5. Text font, size, color and text field formatting options are set in the default configuration for this class.)
- **.SSPro\_Product\_CROSS\_SELLING\_TABLE** (This class formats the cross-selling (related items) table on the bottom of the product details page. Table bordering and padding are set in the default configuration of this class. This table will not appear if not cross-selling items are associated with the specific product being viewed on the details page.)
- **.SSPro\_Product\_CROSS\_SELLING\_ROWS** (This class formats the individual rows of the cross-selling list on the product details page.)
- **.SSPro\_Store\_BreadCrumbs** (This class formats the "bread crumbs" bar that appears on the default configuration of the product details page. The class does not format any content on the /store/item\_view.asp page but instead formats the content of the attached include file: sitestorepro/display/details\_bread\_crumbs\_content.asp)
- **.SSPro\_Option\_Selection\_ERROR** (This class formats the error message text that is returned to the user when they do not complete the add-to-cart form correctly on the product details page; /store/item\_view.asp. Example: if an item has a size list and the user does not select a size , an error message will be generated. The error messages that are formatted by this class are managed in the web-based admin under Store Setup > Item Display Configuration.)
- **.SSPro\_Input\_Fields\_Required\_Star** (This class formats the \* (asterisk) that appears next to a required field on the product details page; /store/item\_view.asp)
- **.SSPro\_Input\_Fields\_Instructions** (This class formats the text instructions that appear in the left column of the add-to-cart table on the /store/item\_view.asp page. The text instructions that are formatted by this class are generated dynamically

from the database from the product's custom input fields. This content is managed per product through the web-based admin system.)

- **.SSPro\_Input\_Fields\_Formatting** (This class formats the single-line, text input form fields on the /store/item\_view.asp page. The fields that are formatted by this class include the custom input text fields 1-5. )
- **.SSPro\_ItemDisclaimerText** (This class formats the disclaimer text that appears on the /store/item\_view.asp page. The content that is formatted by this class is dynamically-generated and managed per product through the web-based admin system. By default, the text element for this class appears directly below the 'Add-To-Cart' button on the product details page.(/store/item\_view.asp))
- **.SSPro\_RecommendedItemsText** (This class formats the text on the recommend\_items.asp page directly below the recommended items banner image.. This is the only class in the site\_store\_pro\_product\_view.css file that does not format elements on the /store/item\_view.asp page. The text that this class formats is dynamically generated and managed through the web-based admin under Store Setup > Item Display Configuration. Note: By default, the Recommended Items Text is empty in the database.)

## SITE\_STORE\_PRO\_TELL\_A\_FRIEND\_FORM.CSS

The site\_store\_pro\_tell\_a\_friend\_form.css file is attached to the /store/ tellafriend/tell\_a\_friend.asp and /store/tellafriend/thankyou.asp pages ONLY. The [“Tell-A-Friend” feature](#) of Site Store Pro is 100% dynamic and controlled completely through the web-based admin system . The form and confirmation page are modified by editing the CSS classes and changing the text elements and page images through the web-based admin under Store Setup > Store & Item Display Setup > [Tell-A-Friend Form Configuration](#).

- **Body** (This class formats the general page properties including background and margins for the tell-a-friend submission form page and the confirmation page. All text and image content on these pages are controlled through the web-based admin system under Store Setup > Store & Item Display Setup > Tell-A-Friend Form Configuration.)
- **.SSPro\_TELLFRIEND\_FORM\_TABLE** (This class formats the main table that contains the tell-a-friend form. The table properties such as width, border and padding are set with this class. Background color, bordering, etc can also be set with this class to modify the appearance of the tell-a-friend form.)
- **.SSPro\_TELLFRIEND\_IMAGE\_SECTION** (This class formats the top section <td> of the tell-a-friend form table where the header image resides. The header image can be modified/changed through the web-based admin system under Store Setup > Store & Item Display Setup > Tell-A-Friend Form Configuration.)
- **.SSPro\_TELLFRIEND\_INSTRUCTIONS** (This class formats the tell-a-friend form instructions section <td>. The text content (instructions) can be modified/changed through the web-based admin system under Store Setup > Store & Item Display Setup > Tell-A-Friend Form Configuration.)
- **.SSPro\_TELLFRIEND\_FORM\_LEFT\_COLUMN** (This class formats the left column <td> of the Tell-A-Friend form and sets the text properties, etc of the form field labels. The form fields labels can be edited in the web-based admin under Store Setup > Store & Item Display Setup > Tell-A-Friend Form Configuration.)
- **.SSPro\_TELLFRIEND\_FORM\_RIGHT\_COLUMN** (This class formats the right column <td> of the Tell-A-Friend form. The right column contains the form fields where the user enters the tell-a-friend recipient information)
- **.SSPro\_TELLFRIEND\_ERROR\_MESSAGE** (This class formats the error message(s) text that is returned when a user does not enter an email address of recipient information correctly in the Tell-A-Friend form. The error messages can be edited in the web-based admin under Store Setup > Store & Item Display Setup > Tell-A-Friend Form Configuration.)
- **.SSPro\_TELLFRIEND\_SUBMIT\_BUTTON\_SECTION** (This class formats the bottom submit section <td> of the tell-a-friend submit form that contains the submit button. Background color, bordering, etc can be set with this class to modify the appearance of the tell-a-friend form.)
- **.SSPro\_TELLFRIEND\_FORM\_FIELDS** (This class formats the properties of the text input fields on the Tell-A-Friend form. Text font, text size, text color, field height, field width, etc can be set with this class to modify the appearance of the input fields.)
- **.SSPro\_TELLFRIEND\_COMMENTS\_COLUMN** (This class formats the user comments section <td> of the tell-a-friend submit form. Background color, bordering, etc can be set with this class to modify the appearance of this section. The comment section text label can be modified in the web-based admin under Store Setup > Store & Item Display Setup > Tell-A-Friend Form Configuration.)
- **.SSPro\_TELLFRIEND\_COMMENTS\_BOX** (This class formats the user comments text input area of the tell-a-friend submit form. Text properties, background color, bordering, etc can be set with this class to modify the appearance of the input box.)
- **.SSPro\_TELLFRIEND\_SUBMIT\_BUTTON** (This class formats the submit button on the Tell-A-Friend form. Text properties, background color, bordering, etc can be set with this class to modify the appearance of the button. The button's text label can be modified in the web-based admin under Store Setup > Store & Item Display Setup > Tell-A-Friend Form Configuration.)

- .SSPro\_Customer\_Section\_Banners (This class formats the section text labels for the various sections of the registration form (shipping information, billing information, etc.)
- .SSPro\_Customer\_Section\_Description (This class formats the text that instructs the user on completing the customer information section that includes their name, address, city, etc.)
- .SSPro\_Customer\_Form\_Fields (This class formats the text input form fields on the registration form and credit card billing information form.)
- .SSPro\_Customer\_Form\_Fields\_ERROR (This class formats the error message text that is returned when a text input field contains invalid data or is left blank for required field(s).)
- .SSPro\_Customer\_Form\_List\_Menus (This class formats the list menu drop-downs on the registration form and credit card information entry form.)
- .SSPro\_Customer\_Form\_List\_Menus\_ERROR (This class formats the error message that is displayed if the user does not make a selection on a required list menu)
- .SSPro\_Customer\_Section\_Footer (This class formats the bottom (closing) row of each section of the registration forms. Includes border and shading formatting)
- .SSPro\_Customer\_Section\_Header (This class formats the top (opening) row of each section of the registration forms. Includes border and shading formatting)
- .SSPro\_Customer\_Receive\_Emails\_TEXT (This class formats the 'Receive Emails' text that is displayed next to the opt-in checkbox)
- .SSPro\_Customer\_AUTOFILL\_Billing\_Fields\_Checkbox (This class formats the 'Copy My Shipping Information Into My Billing Information' text)
- .SSPro\_Customer\_ERROR\_MESSAGE\_Notification (This class formats the error message that alerts the user that there were errors on their registration form submission. Appears on top of page.)
- .SSPro\_Customer\_ERROR\_MESSAGE\_Notification\_DETAILS (This class format the specific text error messages for each element that was not completed correctly. Appears on top of form directly below the Error Message Notification.)
- .SSPro\_Customer\_ErrorMESSAGE\_FIELDS (This class formats the error message that will appear directly below a specific element on the form that was not completed correctly.)
- .SSPro\_Customer\_RequiredStar (This class formats the \* that denotes that the form element is required for completion of the account registration.)
- .SSPro\_Customer\_Bottom\_Text (This class formats the instructions on the bottom of the page for submitting the registration form)
- .SSPro\_Customer\_Section\_Image\_Bar\_Rows (This class formats the rows that contain the specific section graphic header images)
- .SSPro\_Customer\_TermsOfUSE\_TEXT\_DISPLAY (This class formats the terms of use display area when use the non-scrolling option)
- .SSPro\_Customer\_TermsOfUSE\_TEXT\_AREA\_DISPLAY (This class formats the terms of use display area when using the scrollable text box option)
- .SSPro\_Customer\_TermsOfUSE\_Checkbox\_TEXT (This class formats the 'Agree with terms of use' text that is displayed next to the agreement checkbox)

- .SSPro\_Customer\_Registration\_ThankYOU (This class formats the text that is display to the user after a successful account registration (non-order registrations only))
- .SSPro\_Customer\_Activation\_SUCCESS\_TEXT (This class is displayed when a user activates their email address using the [email account activation feature](#))
- .SSPro\_Customer\_Activation\_FAILURE\_TEXT (This text formats the text that is displayed is the user's account email verification fails)
- .SSPro\_Customer\_Activation\_INSTRUCTIONS\_TEXT (This class formats the text that instructs the user how to activate their account using the [email account activation feature](#))

## SITE\_STORE\_PRO\_ACCOUNT\_RETRIEVE.CSS

The site\_store\_pro\_account\_retrieve\_file formats the customer '[Forgot Password](#)' page. This CSS file is attached to /myaccount/ login\_retrieval.asp. The dynamic content for this page is controlled with the '[Forget Password Page Content Manager](#)'.

- .SSPro\_Acccount\_Retrieve\_Instructions (This class formats the instructions for retrieving your password)
- .SSPro\_Acccount\_Retrieve\_FAILED\_Instructions (This class formats the error message that is displayed if the email address that is entered is not found in the system)
- .SSPro\_Acccount\_Retrieve\_Left\_Fields (This class formats the left column of the enter email address row)
- .SSPro\_Acccount\_Retrieve\_Right\_Fields (This class formats the right column of the enter email address row)
- .SSPro\_Account\_Retrieve\_Form\_Email\_Field (This class formats the email address input form field)
- .SSPro\_Account\_Retrieve\_Form\_INVALID\_EMAIL\_ALERT (This class format the error message that is display is the user enters an invalid email format)
- .SSPro\_Account\_Retrieve\_Form\_Email\_Error (This text formats the alternate form field that is displayed when an invalid email is entered)
- .SSPro\_Account\_Retrieve\_Form\_Button (This text formats the "Get My Password" submit button)

## SITE\_STORE\_PRO\_CHECKOUT\_ORDER\_OPTIONS.CSS

The site\_store\_pro\_checkout\_order\_options.css file formats the [checkout order options page](#). This CSS file is attached to /checkout/order\_options.asp. The dynamic content for this page is controlled with the [Checkout Order Options Manager](#).

- .SSPro\_ORDER\_OPTIONS\_WelcomeText (This class formats the page instructions text.)
- .SSPro\_ORDER\_OPTIONS\_Section\_Banners (This class formats the different section headers text.)
- .SSPro\_ORDER\_OPTIONS\_GIFT\_RECIPIENT\_INFO\_INSTRUCTIONS (This section formats the instructions for the [alternate delivery address feature](#).)
- .SSPro\_ORDER\_OPTIONS\_GIFT\_RECIPIENT\_INFO\_SAVED (This class formats the alert message that tells the customer that the [alternate delivery address](#) has been applied to the order.)
- .SSPro\_ORDER\_GIFT\_WRAP\_TABLE (This class formats the table (area) where the customer can select if they want to gift wrap their order.)
- .SSPro\_ORDER\_GIFT\_WRAP\_TABLE\_ROWS (This class formats the background of the gift wrap section rows.)
- .SSPro\_ORDER\_GIFTWRAP\_SELECTION\_MENU (This class formats the [gift wrap selection](#) drop-down list menu.)
- .SSPro\_ORDER\_GIFTWRAP\_CARD\_TEXT\_BOX (This class formats the gift card message input area.)
- .SSPro\_ORDER\_COMMENTS\_TABLE (This class formats the table (area) where the customer can enter their order comments.)
- .SSPro\_ORDER\_COMMENTS\_TABLE\_ROWS (This class formats the background of the comments area row.)
- .SSPro\_ORDER\_COMMENTS\_TEXT\_BOX (This class formats the comments input area.)
- .SSPro\_ORDER\_OPTIONS\_TEXT\_ENTRY\_ERROR (This class formats the text that is displayed when there is an error for a specific required form element.)
- SSPro\_ORDER\_OPTIONS\_SUBMIT\_BUTTON (This class formats the 'Proceed' submit button)
- SSPro\_ORDER\_OPTIONS\_DISCLAIMER (This class formats the disclaimer text that is displayed on the bottom of the order options page.)
- .SSPro\_CREDITCARD\_CVV\_INSTRUCTIONS (This class formats the instructions regarding the credit card CVV value.)
- .SSPro\_CREDITCARD\_PROCESSING\_ERROR (This class formats the error message that is returned when there is an error with a credit card. (example 'Expired Credit Card'.))

- .SSPro\_ORDER\_CUSTOMERINFO\_TABLE\_ROWS (This text formats the rows of the customer information display table if the user has entered their billing information on the registration form instead of the order options page.)
- .SSPro\_UPDATE\_CUSTOMER\_INFO\_ALERT (This text formats the error (alert) message that is display if there is a problem processing the shipping rate request to FedEx, UPS or USPS.)

## SITE\_STORE\_PRO\_CHECKOUT\_ORDER\_REVIEW.CSS

The site\_store\_pro\_checkout\_order\_review.css file formats the [order checkout review page](#). This CSS file is attached to /checkout/order\_review.asp. The dynamic content for this page is controlled with the [Checkout Order Review Page Manager](#).

- .SSPro\_ORDER\_REVIEW\_WelcomeText (This class formats the order review | submission instructions text.)
- .SSPro\_ORDER\_REVIEW\_Section\_Banners (This class formats the different section headers text.)
- .SSPro\_ORDER\_REVIEW\_Columns\_Header (This class formats the shopping cart display (order line items) columns header row.)
- .SSPro\_ORDER\_REVIEW\_Line\_Row\_Formatting (This class formats the line item rows borders, background and text size/color)
- .SSPro\_ORDER\_REVIEW\_STATS\_TABLE (This class formats the section below the line item display area)
- .SSPro\_ORDER\_REVIEW\_ORDER\_SUMMARY\_TABLE (This class formats the order summary display (subtotal, discounts, sales tax, shipping, order total, etc)
- .SSPro\_ORDER\_REVIEW\_ORDER\_SUMMARY\_LEFT\_COLUMN (This class formats the left column of the order summary display area. Formats the text labels for the cart subtotal, adjusted subtotal, giftwrap charge, shipping charge, handling charge, shipping & handling charge, sales tax charge, total charges)
- .SSPro\_ORDER\_REVIEW\_ORDER\_SUMMARY\_LEFT\_COLUMN\_GRANDTOTAL (This class formats the left column on the order total row)
- .SSPro\_ORDER\_REVIEW\_ORDER\_SUMMARY\_RIGHT\_COLUMN (This class formats the right column of the order summary display area. Formats the actual values for the cart subtotal, adjusted subtotal, giftwrap charge, shipping charge, handling charge, shipping & handling charge, sales tax charge, and total charges.)
- .SSPro\_ORDER\_REVIEW\_ORDER\_SUMMARY\_RIGHT\_COLUMN\_GRANDTOTAL (This text formats the order total value text.)
- .SSPro\_ORDER\_REVIEW\_Discount\_TEXT\_LEFT\_COLUMN (This class formats the left column of the coupon code discount, general order discount, preferred order discount, new user discount and total discounts text labels.)
- .SSPro\_ORDER\_REVIEW\_Discount\_TEXT\_RIGHT\_COLUMN (This class formats the text of the coupon code discount, general order discount, preferred order discount, new user discount and total discounts values.)
- .SSPro\_ORDER\_REVIEW\_Disclaimer\_TEXT (This class formats the disclaimer text on the bottom of the order review page.)
- .SSPro\_ORDER\_REVIEW\_DOWNLOAD\_NOTICE\_TEXT (This class formats the download notice text that informs the user that there are downloadable item(s) in the order.)
- .SSPro\_ORDER\_GIFT\_WRAP\_TABLE (This class formats the gift wrap area.)
- .SSPro\_ORDER\_GIFT\_WRAP\_TABLE\_ROWS (This class formats the row of the gift wrap area.)
- .SSPro\_ORDER\_COMMENTS\_TABLE (This class formats the comments area.)
- .SSPro\_ORDER\_COMMENTS\_TABLE\_ROWS (This class formats the row of the comments area.)
- .SSPro\_ORDER\_INSTRUCTIONS (This class formats the order submission (processing) instructions.)
- .SSPro\_ORDER\_SUBMIT\_BUTTON (This class formats the order submit button.)
- .SSPro\_ORDER\_DISCLAIMER (This class formats the disclaimer text that is on the bottom of the order review page.)
- .SSPro\_ORDER\_CUSTOMERINFO\_TABLE (This class formats the customer information table. )
- .SSPro\_ORDER\_CUSTOMERINFO\_TABLE\_ROWS (This text formats the rows of the customer information display table.)

## SITE\_STORE\_PRO\_ERROR\_PAGE.CSS

The site\_store\_pro\_error\_page.css file formats the /store/error.asp page text error messages.

- .SSPro\_ERROR\_CODE\_TEXT (This class formats the specific error code)

- .SSPro\_ERROR\_CODE\_EXPLANATION (This class formats the error code description)

## SITE\_STORE\_PRO\_MY\_ACCOUNT.CSS

The site\_store\_pro\_my\_account.css file formats the customer's [account manager](#) home page and [rewards information and join page](#). This CSS file is attached to [/myaccount/default.asp](#), [/myaccount/rewards.asp](#) and [/myaccount/rewards\\_join.asp](#). (Click links for admin-related pages.)

- .SSPro\_MYACCOUNT\_TOP\_BANNER (This class formats the Page Name Text)
- .SSPro\_MYACCOUNT\_NON\_VERIFIED\_ACCOUNT\_ERROR (This class formats the error message that is displayed when a [non-verified](#) user attempt to checkout)
- .SSPro\_MYACCOUNT\_SECTION\_BANNERS (This class formats the different section banners (headers) such as My Orders, My Downloads and My Wishlists)
- .SSPro\_MYACCOUNT\_RIGHT\_PANEL (This class formats the right column display area)
- .SSPro\_MYACCOUNT\_Welcome\_Message\_Section (This class formats the "[Preferred Customer](#)" message text)
- .SSPro\_MYACCOUNT\_Customer\_Since\_Section (This class formats the "Customer Since (Date)" text)
- .SSPro\_MYACCOUNT\_Last\_Login\_Section (This class formats the last login date text)
- .SSPro\_MYACCOUNT\_PROFILE\_UPDATED\_MESSAGE (This class formats the 'Your Profile Has Been Updated' alert text)
- .SSPro\_MYACCOUNT\_OrderHistory\_COLUMNS (This class formats the order history columns header)
- .SSPro\_MYACCOUNT\_OrderHistory\_COLUMNS\_LEFT\_START (This class formats the far left column of the order history table header)
- .SSPro\_MYACCOUNT\_OrderHistory\_ROWS (This class formats the rows of the order history table)
- .SSPro\_MYACCOUNT\_OrderHistory\_ROWS\_LEFT\_START (This class formats the far left column on the order history rows)
- .SSPro\_MYACCOUNT\_DOWNLOADS\_COLUMNS (This class formats the 'My Downloads' table column header)
- .SSPro\_MYACCOUNT\_DOWNLOADS\_COLUMNS\_LEFT\_START (This class formats the far left column of the My Downloads table header)
- .SSPro\_MYACCOUNT\_DOWNLOADS\_ROWS (This class formats the rows of the My Downloads table)
- .SSPro\_MYACCOUNT\_SERIALNUMBER\_TEXT (This class formats the serial number display on the My Downloads line item row)
- .SSPro\_MYACCOUNT\_DOWNLOADS\_ROWS\_LEFT\_START (This class formats the far left column on the My Downloads table)
- .SSPro\_MYACCOUNT\_DOWNLOAD\_ERROR\_MESSAGE (This class formats the error message that is displayed when the customer encounters a download file error)
- .SSPro\_MYACCOUNT\_WISHLISTS\_COLUMNS (This class formats the columns header in the My Wishlists table)
- .SSPro\_MYACCOUNT\_WISHLISTS\_COLUMNS\_LEFT\_START (This class formats the far left wishlist column header)
- .SSPro\_MYACCOUNT\_WISHLISTS\_ROWS (This class formats the My Wishlist line item rows)
- .SSPro\_MYACCOUNT\_WISHLISTS\_ROWS\_LEFT\_START (This class formats the far left column on the My Wishlist line item row(s))
- .SSPro\_MYACCOUNT\_WISHLIST\_ADDED (This class formats the alert message that is displayed to the user when they add an item to their wishlist)
- .SSPro\_MYACCOUNT\_WISHLIST\_DELETED (This class formats the alert message when an item is removed from a user's wishlist.)
- .SSPro\_REWARDS\_HTML\_FIELD (This class formats the HTML code snippet area where the user can copy and paste the HTML to display rewards link on their website, blog, etc)
- .SSPro\_REWARDS\_SECTION\_BANNERS (This class formats the different sections of the customers rewards account summary area)
- .SSPro\_REWARDS\_SUMMARY\_LINES (This class formats the summary text fields)
- .SSPro\_REWARDS\_DEACTIVATE\_MESSAGE (This class formats the alert text when a user deactivate their rewards membership)
- .SSPro\_REWARDS\_JOIN\_BANNER\_TEXT (This class formats the header text areas on the rewards.asp and rewards\_join.asp pages)
- .SSPro\_REWARDS\_JOIN\_BUTTON (This class formats the 'Join' button on the rewards\_join.asp page)
- .SSPro\_REWARDS\_THANKYOU\_TEXT (This text formats the thank you text that is displayed after a user joins the rewards program)

## SITE\_STORE\_PRO\_CHECKOUT\_ORDER\_DETAILS.CSS

The site\_store\_pro\_checkout\_order\_details.css file formats the customer's order history details page. This CSS file is attached to /myaccount/order\_details.asp. The dynamic content for this page is controlled with the [Order Details History Page Content Manager](#).

- .SSPro\_ORDER\_DETAILS\_WelcomeText (This class formats the page welcome text / instructions)
- .SSPro\_ORDER\_DETAILS\_RETURN\_TO\_ACCOUNT\_LINKS (This class formats the 'Return to My Account Manager' link.)
- .SSPro\_ORDER\_DETAILS\_Section\_Banners (This class formats the section's header text and row background.)
- .SSPro\_ORDER\_DETAILS\_STATS\_TABLE (This class formats the general stats area of the page that includes the Order ID #, Order Date, Order Status and Shipment Tracking #)
- .SSPro\_ORDER\_DETAILS\_STATS\_ROWS (This class formats the rows background and text content on the Order Stats area)
- .SSPro\_ORDER\_DETAILS\_MAIN\_TABLE (This class formats the border, padding and background around the delivery and shipping type information area)
- .SSPro\_ORDER\_DETAILS\_DELIVERY\_INFO\_BOX (This class formats the border, padding of the delivery info area)
- .SSPro\_ORDER\_DETAILS\_DELIVERY\_METHOD\_TEXT (This class formats the delivery type)
- .SSPro\_ORDER\_DETAILS\_DOWNLOAD\_NOTICE\_TEXT (This class formats the download notice text that informs the customer that there are downloadable item(s) in this order)
- .SSPro\_ORDER\_SUMMARY\_BANNER (This class formats the section header above the order details area)
- .SSPro\_ORDER\_DETAILS\_PRODUCT\_LISTING\_TABLE (This class formats the product details (line item display) border)
- .SSPro\_ORDER\_DETAILS\_PRODUCT\_LISTING\_TABLE\_COLUMN\_HEADERS\_LEFTSIDE (This class formats the far left column of the product details column header)
- .SSPro\_ORDER\_DETAILS\_ITEM\_NAME\_TEXT (This class formats the product name text)
- .SSPro\_ORDER\_DETAILS\_SERIALNUMBER\_TEXT (This class formats the item serial number text display)
- .SSPro\_ORDER\_DETAILS\_SKUNUMBER\_TEXT (This class formats the SKU text display)
- .SSPro\_ORDER\_DETAILS\_PRODUCT\_LISTING\_TABLE\_COLUMN\_HEADERS (This class formats the product details header columns)
- .SSPro\_ORDER\_DETAILS\_PRODUCT\_LISTING\_TABLE\_COLUMN\_HEADERS\_RIGHT\_SIDE (This class formats the far right side column of the product details header)
- .SSPro\_ORDER\_DETAILS\_PRODUCT\_LISTING\_TABLE\_LEFTSIDE (This class formats the far left column on the line item rows)
- .SSPro\_ORDER\_DETAILS\_PRODUCT\_LISTING\_TABLE\_ROWS (This class formats the line item rows on the product details table)
- .SSPro\_ORDER\_DETAILS\_PRODUCT\_LISTING\_TABLE\_ROWS\_RIGHTSIDE (This class formats the far right side column on the line item rows)
- .SSPro\_ORDER\_DETAILS\_ORDER\_SUMMARY\_TABLE (This class formats the order summary table border (order summary contains elements such as sub-total, shipping, sales tax, order total))
- .SSPro\_ORDER\_DETAILS\_ORDER\_SUMMARY\_LEFT\_COLUMN (This class formats the left column display of the order summary table including all text labels except Grand Total)
- .SSPro\_ORDER\_DETAILS\_ORDER\_SUMMARY\_LEFT\_COLUMN\_GRANDTOTAL (This class formats the left column in the order summary table that display the order total (grand total))
- .SSPro\_ORDER\_DETAILS\_ORDER\_SUMMARY\_RIGHT\_COLUMN (This class formats the following text fields: subtotal, giftwrap charge, handling charge, shipping charge, shipping & handling charge, sales tax charge and total charges)
- .SSPro\_ORDER\_DETAILS\_ORDER\_SUMMARY\_RIGHT\_COLUMN\_GRANDTOTAL (This class formats the order total (grand total) value)
- .SSPro\_ORDER\_DETAILS\_Discount\_TEXT\_RIGHT\_COLUMN (This class formats the code discount amount, preferred discount amount, general order discount amount, new user discount amount and total discounts values)
- .SSPro\_ORDER\_GIFT\_WRAP\_TABLE (This class format the gift wrapping information area)
- .SSPro\_ORDER\_GIFT\_WRAP\_TABLE\_ROWS (This class formats the row properties such as background, text, font, padding etc)
- .SSPro\_ORDER\_COMMENTS\_TABLE (This class format the comments area)

- `.SSPro_ORDER_COMMENTS_TABLE_ROWS`(This class formats the row properties such as background, text, font, padding etc)
- `.SSPro_ORDER_DISCLAIMER` (This class formats the order details disclaimer text)

## SITE\_STORE\_PRO\_MAIL.CSS

The `site_store_pro_mail_css` file formats the [auto-generated system emails](#). The dynamic content is controlled with the [Emails Manager](#) and the [Order Details Content In Order Confirmation Emails](#).

- `.Body` (Sets page background, default page text and page margins.)
- `a:link` (Sets site links properties.)
- `a:visited` (Sets visited links properties.)
- `a:hover` (Sets properties when hovering over links with mouse.)
- `a:active` (Sets active (clicked) link properties)
- `.bodymain` (Formats the general text of the email such as the Salutation, Message Greeting, Sign-off and Signature)
- `.SSPro_ORDER_DETAILS_WelcomeText` (This class formats the page welcome text / instructions)
- `.SSPro_ORDER_DETAILS_Section_Banners` (This class formats the section's header text and row background.)
- `.SSPro_ORDER_DETAILS_STATS_TABLE` (This class formats the general stats area of the page that includes the Order ID #, Order Date, Order Status and Shipment Tracking #)
- `.SSPro_ORDER_DETAILS_STATS_ROWS` (This class formats the rows background and text content on the Order Stats area)
- `.SSPro_ORDER_DETAILS_MAIN_TABLE` (This class formats the border, padding and background around the delivery and shipping type information area)
- `.SSPro_ORDER_DETAILS_DELIVERY_INFO_BOX` (This class formats the border, padding of the delivery info area)
- `.SSPro_ORDER_DETAILS_DELIVERY_METHOD_TEXT` (This class formats the delivery type)
- `.SSPro_ORDER_DETAILS_DOWNLOAD_NOTICE_TEXT` (This class formats the download notice text that informs the customer that there are downloadable item(s) in this order)
- `.SSPro_ORDER_SUMMARY_BANNER` (This class formats the section header above the order details area)
- `.SSPro_ORDER_DETAILS_PRODUCT_LISTING_TABLE`(This class formats the product details (line item display) border)
- `.SSPro_ORDER_DETAILS_PRODUCT_LISTING_TABLE_COLUMN_HEADERS_LEFTSIDE` (This class formats the far left column of the product details column header)
- `.SSPro_ORDER_DETAILS_ITEM_NAME_TEXT` (This class formats the product name text)
- `.SSPro_ORDER_DETAILS_SERIALNUMBER_TEXT` (This class formats the item serial number text display)
- `.SSPro_ORDER_DETAILS_SKUNUMBER_TEXT` (This class formats the SKU text display)
- `.SSPro_ORDER_DETAILS_PRODUCT_LISTING_TABLE_COLUMN_HEADERS` (This class formats the product details header columns)
